

KOI CARE

Aqua Balance
Blanket Weed Control

Blanket weed can quickly engulf a pond, covering everything in green slimy thread-like weed. This growth is encouraged by poor water quality such as high pH.

Aqua Balance restores the chemical equilibrium in the pond, adding useful trace elements and discouraging blanket weed.

Dosage: Apply weekly from April to September
Add 50 ml of powder to 375 gallons of water (1750 litres)

Pack size	Treats		
	Litres	Imp. Gallons	US Gallons
100 gm	3 500	785	900
