

**KOI CARE**
**Mediclay - Montmorillonite  
Revitaliser Clay**

Pure high grade ultra fine powdered montmorillonite revitaliser clay.

Mediclay controls waste build up of bacteria and algae and pollutants in favour of nitrifiers.

The negative electrostatic charge on the particles of powder attract the positively charged particles of algae and other suspended matter in the water forming larger clumps which are taken away by the filter.

The water becomes crystal clear.

Removal of suspended debris and algae improves the health and appetite of the fish in the pond.

**Dosage:**

Add 50 ml powder to 2000 gallons (9000 litres) of pond water every week.

Pack size	Treats		
	Litres	Imp. Gallons	US Gallons
500 ml	91 000	20 000	24 000
2500 ml	455 000	100 000	120 000
