

KOI CARE

Pond Salt Plus

For winter protection and/or anti-parasite bath

Addition of salt to the pond in autumn is a well known method of encouraging the formation of extra mucus on the skin as winter protection.

Pond Salt Plus also acts as a dip treatment for many infections and can reduce nitrite toxicity.

See the information sheet **Dip Treatments for Fish Diseases** in the Technical Information section of this site.

Pond Salt Plus is best used in conjunction with the **Pondlab Salt Tester**

Dosage:

Add 50 ml to 5 gallons (25 litres) of pond water. (3 gm/litre)

Pack size	Treats		
	Litres	Imp. Gallons	US Gallons
1000 ml	500	120	140
3000 ml	1500	360	420
