DIMENSION

INSTALLATION

1. Input voltage is DC12V. The lamps must be connected with transformer.
2. The junction box is located at least 1200mm from the edge of the pool.

Figure 1

3. The mounting bracket must be properly installed so that the top edge of the light's lens is at least 450mm below the water level in the pool. see Figure 1.

4. Make sure the surface of pool wall is flat.
Fix the bracket with 4pcs screws.

5. If the cable connection is done underwater, the connection part must be **waterproof protected** (use waterproof cable gland or fill with epoxy glue). Otherwise, the water will come in the lamp through the wires.

6. Connect all wires to the corresponding circuit wires in the junction box and feed epoxy.
7. Before operating the light for more than 10 seconds fill pool until the light is completely submerged in water.
8. It is easy to replace the lamp.
